## 4. FIRST AID MEASURES

### First Aid Procedures:

<b>Inhalation:</b>	Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. WARNING! It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled or ingested material is toxic, infectious, or corrosive. Do not use mouth-to-mouth resuscitation if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Call a poison center or doctor if you feel unwell.
<b>Ingestion:</b>	Rinse mouth. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, keep head low so that vomit does not enter lungs. Never give anything by mouth to an unconscious person. Call a physician or poison control center if symptoms occur.

<b>Skin Contact:</b>	Wash skin with plenty of water for at least 15 minutes. Remove contaminated clothing and shoes. Wash clothing before reuse. If skin irritation or rash occurs: Get medical attention.
<b>Eye Contact:</b>	Check for and remove contact lenses if present and easy to do. Immediately flush eyes with gentle but large stream of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Immediately call a poison center or doctor.
<b>General Advice:</b>	Poison information centers in each state can provide additional assistance for scheduled poisons. Ensure that medical personnel and those providing first aid are aware of the material(s) involved and take precautions to protect themselves.
<b>Symptoms and Effects:</b>	Irritation, burns, headache, nervous system effects, nausea, vomiting, diarrhea, decrease in motor function, skin discoloration, urine discoloration, blindness. Harmful if inhaled or exposed to the eyes. May be harmful if swallowed or exposed to the skin. Causes irritation and burns to the eyes, skin, respiratory tract, and gastrointestinal tract. May affect central nervous system and eyes. Prolonged or repeated exposure may affect several organ systems; may cause adverse reproductive effects, mutagenic effects, birth defects, developmental effects, sensitization, and cancer.
<b>Immediate Medical Care/ Special Treatment:</b>	Immediate medical attention may be required. Call a physician or poison control center immediately if symptoms occur. Treat symptomatically.

## 5. FIREFIGHTING MEASURES

<b>Suitable Extinguishing Media:</b>	Water spray, dry powder, alcohol resistant foam, carbon dioxide.
<b>Unsuitable Extinguishing Media:</b>	Do not use a solid (straight) water stream, as it may scatter and spread fire.
<b>Hazardous Combustion Products:</b>	Carbon oxides.
<b>Specific Hazards:</b>	Excessive thermal conditions may cause decomposition and yield corrosive and/or toxic fumes. Product may undergo polymerization if methanol stabilizer is dried.
<b>Special Protective Equipment/ Precautions for Firefighters:</b>	As in any fire, wear MSHA/NIOSH approved (or equivalent), self-contained, positive-pressure or pressure-demand breathing apparatus and full protective gear. Use water spray to cool unopened containers. Move containers from fire area, if you can do so without risk. In the event of fire and/or explosion, do not breathe product fumes.

## 6. ACCIDENTAL RELEASE MEASURES

<b>Personal Precautions and Protective Equipment:</b>	Ventilate area of leak or spill. Isolate hazard area and keep unnecessary and unprotected personnel away from the area of the leak or spill. Keep upwind. Keep out of low areas. Wear appropriate personal protective equipment (see Section 8). Avoid contact with eyes, skin, and clothing.
<b>Emergency Procedures:</b>	In case of chemical emergency, or if unsure how to address an accidental release, consult a professional (see Section 1).
<b>Methods for Containment:</b>	Stop the flow of material, if this is without risk. Prevent entry into waterways, sewer, basements, or confined areas. Dike the spilled material, where this is possible. Product should not be released to the environment. Contain and recover liquid when possible.
<b>Methods for Cleanup:</b>	Absorb spill with an inert material (e.g. vermiculite, dry sand, earth, cloth, or fleece) and place in a non-combustible container for reclamation or disposal. Do not flush to sewer.

Clean contaminated surface thoroughly. Residues from spills can be absorbed with water or alcohol. Never return spills in original containers for reuse. Clean up in accordance with all applicable regulations.

## 7. HANDLING AND STORAGE

**Handling:** Wear personal protective equipment (see Section 8). Use only in well-ventilated areas. Provide sufficient air exchange and/or exhaust in work areas. Avoid contact with skin, eyes, and clothing. Do not breathe vapors or spray mist. Do not ingest. When using, do not eat, drink, or smoke. Keep away from incompatible materials (see Section 10). Handle in accordance with good industrial hygiene and safety practice. Wash thoroughly after handling. Containers of this material may be hazardous when empty, as they retain product residues. Observe all warnings and precautions listed for this product.

**Storage:** Store in a cool, dry, ventilated area. Store away from incompatible materials (see Section 10). Store in original container. Keep containers tightly closed and upright. Keep away from food, drink, and animal foodstuffs. Keep out of the reach of children. Comply with all national, state, and local codes pertaining to the storage, handling, dispensing, and disposal of this product.
